Email: asi.roopa@capgemini.com

Roopa Asi is a Senior Analyst with the Capgemini Testing from December 2022.

She has 3 Years of experience in Software Testing, proficient in testing web based and desktop Applications using Java with Selenium WebDriver and UFT. Strong in SDLC, STLC and Defect Life Cycle Proficiency in Agile Sprint Test Plan.

She has excellent skills in identifying defects and reporting defects in JIRA. He is familiar with Agile model.

She has good exposure on Core Java concepts. He has good knowledge on Selenium Automation testing using Java.

Professional Synopsis

- Software Test Engineer with 3 Years of experience in Software Testing, proficient in testing web-based Applications using Java with Selenium WebDriver. Strong in SDLC, STLC and Defect Life Cycle Proficiency in Agile Sprint Test Plan.
- Hands on Experience of different types of testing like Sanity, Re-Testing, Regression Testing.
- Knowledge of Functional Testing concepts, Methodologies, and Test Case Design.
- Hands on experience of handling I frames, Mouse hover actions, Popups and List Box using Action Class and Select Class.
- Experience in Build Management Tool which is Maven for the Data Driven Framework.
- Hands on with Automation framework design and implementation according to project structure
- Involvement in Test Execution, Result Analysing and defect reporting.
- Performed Tester activities for automation testing execute, maintain & enhance the existing new automation test suite.
- Strong understanding of Java & OOPS concepts.
- Create and maintain libraries and object repositories for the Automation Framework.
- Exposure to terms like Method Overloading and Method Overriding, Inheritance, Abstraction, Encapsulation and Polymorphism.
- Hands on experience in end to end functional and regression testing of applications, including requirements understanding, test case and Scenario Development, test execution, results analysis and sign off.
- Secondary skill: Skill in scripting for automation and test development within Microfocus UFT One.
- Utilized VBScript for script customization, error handling, and result analysis.

Technical Skills

- | | |
|----------------------------------|---------------------|
| • Operating Systems | : Windows 7,8,10,11 |
| • Programming / Web Technologies | : Core Java |
| • Project Management Tool | : JIRA, ALM Octane |
| • Automation Testing Tool | : Selenium, UFT |
| • Automation Framework | : Cucumber |
| • Manual & Automation Testing | |

Engagement History

Project: TGE Description:

TGE is Names as Team Global Express its mainly designed for transportation of good using different transport modes. Freight involved is typically large, bulky making logistics one of the most demanding areas of supply chain and transportation.

Roles and responsibilities:

- Collaborated with Functional team to understand the functionalities. Developed test script using VBScript in UFT
- Collaborated with the Support Team to understand the functionalities and developed test scripts.
- Performed System testing on Test, UAT and Prod environments
- Managed and maintained the Regression Testing Suite, ensuring the stability and reliability of automated scripts.
- Provided critical support for major releases, ensuring thorough testing and timely delivery.
- Developed P1, P2, and P3 automation scripts. Additionally, implemented health check processes to ensure continuous monitoring and stability of application performance.
- Finding defects and reporting defects in the JIRA tool.
- Actively participated in scrum ceremonies as part of the Agile SDLC, including sprint planning, reviews, and retrospectives.
- Created test batches, executed test cases, and logged defects using Dynatrace.
- Contributed to version control and code management by pushing updates to Git repositories. Played a key role in setting up and optimizing the CI/CD pipeline within Git to streamline software deployment and enhance development efficiency.

Project: Alstom Description:

Anaplan is a purpose-built platform connecting people, data, and plans, Anaplan delivers a unified realtime, cloud-based environment to optimize planning and democratize decision-making across all lines of business and business activities, from strategic to operational levels.

Roles and responsibilities:

- Developed Automation Script for multiple workflows for web applications.
- Created test scripts using JAVA, TestNG, Selenium WebDriver and Maven for UI. Understand the real time

scenarios and provide business with the correct approach.

- Involved in the preparation of test scripts and test cases and test execution and performed end-to-end automation testing for the website using BDD Cucumber.
- The test strategy used is Page factory for testcase management.
- Investigate issues, bugs, and Utilized Jira for issue tracking, bug reporting, and project management, ensuring effective communication and coordination within the team. Effectively participated in everyday Agile Scrum stand-up meetings and participated in retrospective meetings.

Training Certifications

- Agile with Atlassian Jira – Coursera
- Agile Software Development – Coursera
- Micro Focus UFT One - Udemy
- Selenium with java ,cucumber and FrameWork - Udemy
- Microsoft Azure Fundamentals (AZ – 900)

Academic Qualifications

2018-2022

Bachelor of Technology (B. Tech)

Raghu Institute of Technologies – Vijayanagaram
