

ROOPA ASI

Senior Automation Test Engineer

9490923757 @ asiroopa@gmail.com https://www.linifiedin.com/in/asi-roopa
Bangalore, India

SUMMARY

Automation-focused Senior Test Analyst with 3+ years of IT experience, specializing in Selenium (Java), UFT, functional testing across Logistics enterprise applications. Strong expertise in test management, regression testing, defect management, and Agile/Scrum methodologies using JIRA. Proven track record of delivering high-quality products through effective collaboration, risk-based testing, and process optimization in fast-paced Agile environments.

EXPERIENCE

Senior Project Engineer

Capgemini

12/2022 - Present India

Automation Tester

- Experienced Automation Test Engineer with hands-on expertise in Selenium Java and BDD Cucumber, contributing to scalable Page Factory-based automation frameworks and ensuring stable, high-quality regression execution.
- Skilled in cross-environment testing, script optimization, and effective defect management, ensuring reliable and efficient software delivery across releases.
- Expertise in functional, regression, sanity, health-check, and end-to-end testing to ensure software reliability.
- Managed code repositories using Git and implemented CI/CD pipelines with GitLab, reducing regression and release cycle times by 80%.
- Designed and executed 300+ test cases, ensuring comprehensive coverage and high-quality deliverables.
- Performed desktop application testing using UFT. Optimizing test scripts to improve maintainability, test coverage, and execution speed.
- Strong understanding of the Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), and Agile methodologies for effective collaboration with cross-functional teams.
- Implemented Extent Reports to generate structured HTML reports, enhancing test result visualization and reporting efficiency.
- Reduced manual testing efforts by 85% by implementing automated tests with Uft.
- Created test batches, executed test cases, and logged defects using Dynatrace.
- Skilled in analyzing user stories, writing test scenarios, and managing defects across multiple environments.
- Proficient in defect tracking and test management tools like JIRA & ALM Octane.
- Acquired foundational knowledge of Generative AI tools and AI agents through a Udemy
- Completed JavaScript with Playwright training, gaining foundational knowledge of modern UI automation concepts.

PROJECTS

TGE(Jtollworks and Etollworks)

- Developed and maintained automated test scripts and regression packs using Selenium (Java), TestNG, and Cucumber (BDD) to validate web application functionality against business requirements.
- Executed end-to-end automation and regression packs for web applications, ensuring consistent, high-quality deliverables across releases.
- Implemented the Page Factory design pattern to create scalable, reusable, and maintainable automation frameworks.
- Performed system testing across Test, UAT, and Production environments, ensuring application stability, reliability, and release readiness.
- Created test cases, logged and tracked defects using JIRA, and collaborated with cross-functional teams to ensure timely defect resolution and quality releases.
- Optimized automation scripts and regression pack execution to improve maintainability and efficiency, reducing test cycle time and increasing overall productivity.

TGE(Tollworks)

- Designed test case using VBScript in UFT for desktop application.
- Provided critical support for major releases, ensuring thorough testing and timely delivery.
- Delivered automation solutions for P1, P2 and P3 test cases. Implemented health check processes to enable continuous monitoring and maintain application stability.
- Performed system testing activities across Test, UAT, and Prod environments.
- Created test batches in Batch Runner tool, executed testcases, and logged defects using Dynatrace.
- Contributed to version control and code management by pushing updates to Git repositories.
- Played a key role in setting up and optimizing the CI/CD pipeline within Git to streamline software deployment and enhance development efficiency.

SKILLS

Automation Testing, Manual Testing, Selenium, Java, TestNG, UFT, VB Script, Cucumber, BDD, JavaScript, Playwright, ALM Octane, GIT, Maven, Extent Reports, Regression Testing, Test Case Creation, Defect Management, Test Management, JIRA, Agile Methodology.

LANGUAGES

English	Proficient	
Telugu	Native	
Hindi	Beginner	

KEY ACHIEVEMENTS

- Recognized as **'Star Performer'** by the client for delivering high-quality automation solutions and meeting critical project deadlines.
- Integrated automation suite into **GitLab CI/CD**, enabling nightly execution and email reporting for stakeholders.
- Maintained **98%** defect identification accuracy and reduced production defects by detecting issues early and collaborating effectively with teams

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ – 900)
- Selenium with java, cucumber
- Micro Focus UFT
- Generative AI tools & Agents

EDUCATION

Bachelor of Technology
Raghu institute of Technology

2019 - 2022
